January 25th, 2018

Hello!

My name is Joanne Yeager. For the next few months, I will be working as a student teacher in your student's classroom. I am currently enrolled in the Teacher Certification Program at Albright college, completing biology certification teaching 7th through 12th grade. This is my final semester of the education program in which I am enrolled. Previously, I completed observations at Jenkintown High School and Muhlenberg High School, and I have spent the last three weeks observing Mr. Hertzler in his classes. I am looking forward to this unique learning opportunity in your student's classroom.

I am originally from Jenkintown, Pennsylvania, and for the past four years, I have attended Albright College. I graduated in May of 2017 with a Bachelor's degree in biology, and I will complete the Masters of Education program this summer. While taking courses at Albright, I worked in the biology labs as a teacher's assistant and in the tutoring center, both of which gave me experience working with teaching content and working with students of different abilities. In addition to the work I completed at Albright, I have also been a summer camp counselor for the past five years, working with middle and high school-level students. My goal is to obtain a teaching position in the natural sciences, working with either middle school or high school students.

I will be working with the students at Twin Valley High School in various capacities, and as the semester progresses, I will gradually increase my responsibilities with the students and within the classroom. I am excited to work with your adolescent! Please do not hesitate to stop in or email me at the address listed above if you have the time, as I would welcome the opportunity to get to know you along with your student.

Sincerely,

Ms. Joanne Yeager
